The revenue from filming business was RMB32.9 million, representing a year-on-year increase of 121.4%. Our filming business has entered into a phase of matrix product development in early 2020 and we will further enrich our IP reserves and promote film production. Looking forward, the Group will further develop its business in the cultural fields such as gaming, film and television to promote the development of the industry by providing high quality cultural products.

### **Research and development of new products and accelerating expansion of overseas game markets of Linekong Games**

In order to further enrich its product lines and enhance the competitiveness of the Group in the casual games market, a casual games development team has been established for the research and development of products such as ultra-casual, moderate casual, strategy and female-oriented games. “金幣大冒險”, named as Coin Tycoon in overseas markets and independently developed by the Group, is a game about the civilization evolution and technology development of a world with players participating in casual social activities. The game was launched in North America for a small scale paid non-deletion test in July 2020. The retention and payment records of the game are satisfactory and is under the process of further improvement. “蠻荒紀元” is a new MMORPG fairy tale mobile game and is scheduled to be launched in the third quarter of 2020. The game features beautiful and vivid graphics to provide great game experience and allows players to experience the prosperity of ancient China. The mobile game “十萬個冷笑話 • 懷舊版” is expected to commence external deletion testing in the third quarter of 2020. The classic game has been completely optimized and upgraded, allowing players to return to the game world. “新後宮甄嬛傳”, a female-oriented AVG+RPG game distributed under the gaming business, will also be launched this year. It is a game to reveal the lifestyle in the palace of Qing dynasty with 2D style graphics. In respect of our games business segment in South Korea, we officially distributed “一夢江湖” (formerly known as “楚留香”) (“검은달” in Korean), a game developed by NetEase Games, on March 18, 2020. In addition, based on our research and analysis of overseas markets, the Group has prioritized the expansion of the Japan market as the focus of our overseas expansion after South Korea. Our Japan distribution team was established in 2019, the members of which have experience in publishing top 30 best-selling games in Japan. The Group has recently been licensed to exclusively adapt and globally distribute the mobile version of the epic ARPG game in Japan “Ys VIII”. The mobile version of the game will be launched soon. The adaptation of the mobile version of “Ys VIII” will be supervised by Falcom to offer exciting gaming experiences to players. ### **Linekong Pictures has entered into a phase of matrix product development, ensuring that prime dramas and secondary dramas will continue to be well-received**

In 2020, we have entered into a phase of matrix product development to focus on target audiences and ensure that our prime dramas and secondary dramas will continue to be well-received. After over four years of experience and accumulation of brands, Linekong Pictures has a series of outstanding drama reserves, including prime drama (頭部劇), secondary drama (腰部劇) and movie (電影).

“琴瑟緣” and “雲海傳”, formerly known as “the Tomb Guardian (鎮墓獸)”, are the prime IPs (頭部 IP) of Linekong Pictures. A nostalgic animated IP, “琴瑟緣” (created by S-class creator team), is the first ancient costume fairy drama in China based on ancient music and its production is scheduled to commence in December 2020. The touching and romantic drama reproduces the forgotten legend of ancient musical instrument and the beauty of stunning ancient music, shows the unique charm and connotation of the nation, and creates new dynamics in traditional culture. The original IP was included and ranked first in the 2017 List of National Items for Reforms and Development (改革發展項目庫2017年入庫名額). The comic on which the drama was based on included in the 2016 Mobility Supporting Plan for Chinese Original Comic and Animation (2016年原動力中國原創動漫出版扶持計劃) by the National Radio and Television Administration (國家廣電總局). “雲海傳”, which is scheduled to commence production in October 2020, is the first ancient-setting youth adventure drama in China co-produced by Cai Jun (蔡駿) and Tian Xia Ba Chang (天下霸唱). It is a courageous and enthusiastic story of three young men who are going to embark upon their journey of treasure hunt without a map to reveal the truth of a ten-thousand year old treasure, growing together hand-in-hand in adversity and choosing between right and wrong.

After the completion of three selected dramas including “Long For You (我與你的光年距離)”, “Unexpected (來到你的世界)” and “Long For You 2 (我與你的光年距離2)”, the Group cooperated with Mango TV and produced a romance drama, “Love The Way You Are (身為一個胖子)”, which was broadcast between December 2019 and January 2020. The drama received overwhelming responses from the audiences during the broadcast. The drama was spontaneously shared among the audiences on major internet platforms such as TikTok, Weibo and Kuaishou. In addition, the filming of “原來你是這樣的顧先生”, a new drama jointly produced with Tencent Penguin Pictures, has completed in Chengdu in April 2020. With its light comedy and fashion elements, the drama will present a warmhearted sweet love story to the audiences. The drama will be broadcast on Tencent Video. The ancient romantic drama “花好月又圓”, an excellent original IP jointly developed by the Group and Youku, has completed in Hengdian in June 2020 and will be launched in 2020. It is about a smart, simple and kind travelling showgirl named “小丸子” (played by Li Gengxi), who pretends to be a princess and mistakenly get married with “梅三少” (played by Huang Junjie), a young general who is arrogant, snarky and yet righteous-minded. The sweet and perfect couple is destined to get married and write their love story against all odds.

In 2020, the Group will continue to enrich its IP reserves. “喂兒” is a new style drama and a key project of the Group. The project is adapted from a popular IP written by Nan Bei Zhu Feng (南北逐風) of Changpei Wenxue (長佩文學), which is a unique crosstalk drama in the market. The drama integrated traditional culture as well as youth and enthusiasm. It tells the story about a pair of crosstalk partners who strive to revive traditional culture and unravel the impact of traditional culture on youngsters nowadays and the inheritance of traditional culture. In addition, an urban inspirational idol drama “再次遇見你”, adapted from a well-known IP, is scheduled to start filming in November 2020. Targeting modern striving females who struggle between marriage and love, the drama tells a sweet and real-life story about an imaginary utopia where a couple gets married after falling in love. An original urban love comedy of the Group, “小未來·將將好”, is scheduled to start filming in 2020. Set against a backdrop of an old mansion in Shanghai in 2028, it is about a hilarious battle of wits and courage among five teenagers who share the same house. They comfort and support each other and grow together in laughter and tears as the story revolves around love, friendship, dream and hope. As for film production, the movie “給初戀的你” will start in the first half of 2021.

During the reporting period, the artist agency business of the Group was also developing steadily. Linekong Pictures has currently signed contracts with various actors of the new generation, such as Mr. Ding Jiawen, Mr. Wang Guangyuan and Ms. Zhang Ge. Mr. Ding Jiawen has been highly regarded due to his role of Cao Ping (“神仙哥哥”) in a recent popular TV drama “Serenade of Peaceful Joy (清平樂)”. In addition, he also appeared in the new TV dramas “乘風少年”, “原來你是這樣的顧先生” and “花好月又圓” which will be broadcast in the second half of 2020. Mr. Wang Guangyuan starred as the lead actor Luo Xiaoyi in “老師·好” and is being quickly known by audiences due to his outstanding performance. He received numerous attention and acknowledgement inside and outside of the industry, as well as favorable criticism of the movie he starred in. The Interim Financial Information is presented in Renminbi (“**RMB**”), unless otherwise stated.

The Interim Financial Information has not been audited.

## 2. Basis of preparation

The Interim Financial Information has been prepared in accordance with International Accounting Standard (“IAS”) 34, “Interim financial reporting”. The Interim Financial Information does not include all the notes of the type normally included in an annual financial report. Accordingly, the Interim Financial Information should be read in conjunction with the annual consolidated financial statements of the Company for the year ended December 31, 2019 as set out in the 2019 annual report of the Company (the “**2019 Financial Statements**”) and any public announcements made by the Company during the interim reporting period, which have been prepared in accordance with all applicable International Financial Reporting Standards (“IFRSs”).

## 3. Summary of significant accounting policies and critical accounting estimates and judgments

### 3.1 Summary of significant accounting policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended December 31, 2019, as described in those annual financial statements, except for the estimation of income tax using the tax rate that would be applicable to expected total annual earnings and the adoption of new and amended standards as set out below. The Interim Financial Information has been prepared under the historical cost convention, as modified by the revaluation of financial assets at fair value through profit or loss and an associate measured at fair value through profit or loss which are carried at fair value.

#### (a) *New and amended standards adopted by the group*

A number of new amendments to accounting standards became applicable for the current reporting period. The Group did not have to change its accounting policies or make retrospective adjustments as a result of adopting these amendments.

### **3. Summary of significant accounting policies and critical accounting estimates and judgments (Continued)**

#### **3.1 Summary of significant accounting policies (Continued)**

*(b) Impact of standards issued but not yet applied by the entity*

Certain standards, amendments and interpretations to existing standards which have been issued but are not yet effective for the financial period beginning January 1, 2020, are not expected to have a material impact on consolidated financial statement in the foreseeable future. The Group is in the process of making an assessment of the impact of these new standards, amendments and interpretations to existing standards.

#### **3.2 Critical accounting estimates and judgments**

The preparation of the Interim Financial Information requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

When preparing the Interim Financial Information, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those applied to the 2019 Financial Statements.

## 4. Financial risk management

### 4.1 Financial risk factors

The Group is subject to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and concentration risk.

The Interim Financial Information does not include all financial risk management information and disclosures required in the annual financial statements, and should be read in conjunction with the 2019 Financial Statements.

There have been no changes in the risk management policies during the six months ended June 30, 2020.

### 4.2 Fair value estimation

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The financial assets of the Group are all categorised within level 3 as of June 30, 2020 and December 31, 2019.

The Group did not have any financial liabilities that were measured at fair value as of June 30, 2020 and December 31, 2019.

## 4. Financial risk management (Continued)

### 4.2 Fair value estimation (Continued)

There were no transfers among level 1, 2 and 3 during the six months ended June 30, 2020.

The fair value of financial instruments traded in active markets is determined based on quoted market prices at the end of the reporting period. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry Group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required for evaluating the fair value of a financial instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Specific valuation techniques used to value financial instruments include:

- quoted market prices or dealer quotes for similar instruments;
- discounted cash flow models and unobservable inputs mainly including assumptions of expected future cash flows and discount rate;
- a combination of observable inputs and unobservable inputs, including discount rates, risk-free interest rates, expected volatility and revenue multiples.

#### 4. Financial risk management (Continued)

##### 4.2 Fair value estimation (Continued)

	As of June 30, 2020	Valuation technique	Significant unobservable inputs	Percentage or ratio range
Unlisted securities	37,342	Discounted cash flow model	Discount rate	21% ~ 26%
			Terminal growth rate	3%
			Discount for lack of marketability	20% ~ 26%
			Volatility	33% ~ 61%
Unlisted securities	23,705	Market approach	Revenue multiples of comparable companies	1.06 ~ 2.96
			Discount for lack of marketability	15% ~ 20%

An associate at fair value through profit or loss comprises an investment in a private equity fund which is subject to the terms and conditions of the fund's offering documentation. The value of the associate is primarily based on the latest available financial/capital account statement reported by the general partner of the fund, unless the Group is aware of reasons that such a valuation may not be the best approximation of fair value. The Group may make adjustments to the value based on considerations such as: the underlying investments of the fund, the valuation date of the net asset value provided, cash flows since the latest valuation date, and the basis of accounting of the underlying fund. The unobservable inputs which significantly impact the fair value are the net asset value of the net assets of the fund reported by its general partner.

The chief operating decision maker (“**CODM**”) of the Group, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the executive directors that make strategic decisions.

The Company separately manages the production and operation of each segment and evaluates their operating results respectively, in order to make decisions about resources to be allocated to these segments and to assess their performance. Assets subjected to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. For one game of which the operation does not meet the original budget, the Group performed the impairment test of its related licenses on the single game's operation. Calculation in value in model uses pre-tax cash flow projections covering a three-year license period using the average revenue growth rate approximately-33%. The discount rate used is 20%.

The valuation results indicate that the recoverable amount is higher than the carrying amount, and there is no evidence of impairment.
